Foshan NUOE Combustion Control Technology Co., Ltd.

A-PRO Self-Preheating Burner

Energy saving / low nitrogen

Features

- ☐ The waste heat is recovered with its own heat exchanger, and the combustion-supporting air can be preheated up to 650 °C.
- Modular design, each module can be replaced and maintained separately.
- ☐ Suitable for pulse control and continuous control.
- ☐ Staged combustion, combustion is more environmentally friendly.
- ☐ The electrode has its own cooling air protection circuit and has the functions of detection and ignition at the same time.
- Heat-resistant steel heat exchanger, suitable for a variety of heat treatment furnaces below 950°C.

Product Description

Air shell: Cast aluminumAir inlet material: Cast aluminum

• Applied maximum furnace 1250° C

• temperature: 2848W5/SUS310s/Silicon carbide

Heat exchanger quality: SUS 310S/Silicon carbide
 Combustion head material: Cast aluminum/Q235

Fixed flange: 15~250KW
 Power: 80mbar
 Air inlet pressure: 60mbar

• Gas inlet pressure: NG /LPG/COG

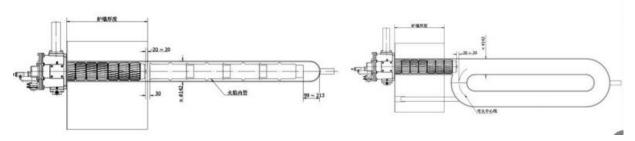

Fuel: 1:3
 Adjustment ratio: 1.05

Air excess coefficient

Product performance

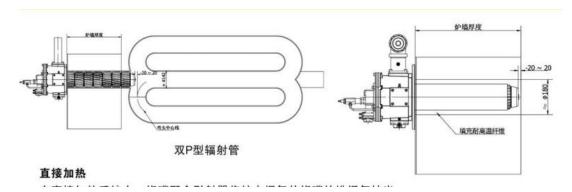

A-PRO Self-Preheating Burner is a new generation of high efficiency burners and an upgraded version of the A-MAX series. Compared with A-MAX series, A-PRO uses CFD simulation technology to optimize and reconstruct the heat exchanger structure. Under the condition of weight loss, the heat transfer efficiency is increased by 15%, and the exhaust temperature is lower.

The A-PRO shell adopts die-casting process, which has the advantages of lighter weight, higher structural strength and less flow resistance.

Type I radiation tube

Type P radiation tube

Double P-type radiation tube

Filled with high temperature resistant fiber

Direct heating

In the direct heating system, the burner cooperates with the injector to extract the flue gas from the furnace from the exhaust gas of the burner.

Type selection

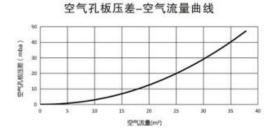

| Model | A-PRO | 1MB | 545 | I | | | | | | |
|---|-------|-----|-----|---|--|--|--|--|--|--|
| Rated Power 1MB: 36KW, 2MB: 60KW, 3MB: 100KW, 4MB: 1 80KW, 4MB: 250KW | | | | | | | | | | |
| Burner Length 545, 595, 645, 545+n*50 | | | | | | | | | | |
| D: Direct heating(Need matching flue gas reflux sleeve and Ejector) I: Indirect heating | | | | | | | | | | |

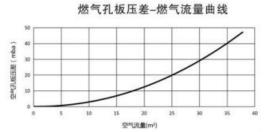

Example: A-PRO 1MB 6451 (Burner Length 645, Indirect heating, no need for flue gas reflux sleeve and ejector)

Pressure-flow characteristics
